Group 306: Final blueW Report

NETFLIX

The **Future** of Television

Netflix's market is significantly more saturated

Surface-level issues

More Competitors

More direct competitors entering the market

Most have similar prices, content, and more cash to spend when compared to Netflix (CNN)

Licensing Concerns

Studios that are wary of Netflix may refuse to licence their media

Some media groups have created their own streaming services with rights to their shows

Netflix's market is significantly more saturated

Deeper issues

Viewer Engagement

Netflix's viewer engagement (2.2 hours per day) is outmatched by that of smaller streaming services.

Other companies are matching Netflix's engagement

Casual Stream Services

1

Be bold

Explore new markets while producing and streaming content local to the area.

Opportunity to hold library of exclusive content from local studios

Cloud-based options available in Alibaba and Tencent

More efficient solution than current hardware boxes from Xiaomi

2

Be different

Diversify streaming library by adding content from non-traditional platforms

Develop platform for streams of games, VR, and other technologies

Offer streaming solution to sports leagues like the NBA

Offering more faith-based content

3

Be smart

Use advanced algorithm and big data to select and promote shows.

Personalize ads to promote Netflix's original content

Use big data to select new exclusives

Netflix's potential around the world

1

	Size of the Media Industry	Streaming Service Need	No Established Players	Projected Speed of Adoption
<u>China</u>				
<u>India</u>				
<u>Russia</u>				
<u>Japan</u>				

Media industry is the fastest growing in the world.

Pirated hard copies lost companies 4.2bn in revenue last year.

Alibaba is the only established media site, but thousands of studio ideas are turned down

Increasing rate of internet penetration means high speed of adoption

China and its media consumption market

1

Demand of the Market

1

Issue with hardware piracy in China

\$4.2b
lost in revenue

2

Many Chinese dramas go unfunded

52%
of cases

Size of the Market

Global Box Office 2017

■ China ■ USA & Canada ■ Other

There is opportunity for Netflix to capture the remaining market

Competitors that could threaten Netflix

1

Large cloud-based library based in China

Lacks any engagement features such as recommendations.

NETFLIX

Has ability to store large library of media using AWS cloud

Can use existing technology to bring additional features to streaming

Superior performance due to support from hardware element

Expensive: Must pay for hardware and premium subscription service

Netflix can use its existing infrastructure to capitalize on uncaptured demand in the industry

Netflix's move to the United Kingdom

Case Study

Problem

Highly rated BBC content with limited streaming options for exposure both domestically and internationally

Opportunity

Partnership between Netflix and BBC

Result

35% increase in expected subscribers. 28% increase in ratings for BBC shows

NETFLIX

1

Be bold

Explore new markets while producing and streaming content local to the area.

Opportunity to hold library of exclusive content from local studios

Cloud-based options available in Alibaba and Tencent

More efficient solution than current hardware boxes from Xiaomi

2

Be different

Be smart

Use advanced algorithm and big data to select and promote shows.

Personalize ads to promote Netflix's original content

Use big data to select new exclusives

Netflix's possible diversification methods

2

Diversification Strategy

Consumers Retained through

1

Sports Streaming

- Streams are being tested by other services

Reliable 60fps/1080p streams that are otherwise unavailable

2

Faith-based Content

- 8.6 Average rating on Netflix

Wider selection of popular genre in Netflix

3

Game/VR Streaming

- Promotes interactivity
 - Requires expensive infrastructure

Drastic diversity in content produced and streamed. Allows Twitch-like p2p interactions.

Netflix and NBA League Pass

NBA LEAGUE PASS

NETFLIX

Netflix and NBA League Pass

2

Greater Exposure

NBA League Pass only sells 26M game views

Choice of Game

Can gain revenue through Netflix bidding on games

Piracy

Can cut down on illegal streams

NETFLIX

Netflix and NBA League Pass

2

NBA LEAGUE PASS

NETFLIX

Low Cost

Expected bids for low-tier games should be inexpensive

More Engagement

Uptimes for sports games are 3 hours+

Wider Consumer Reach

Value proposition through exclusive streams with NBA

1

Be bold

Explore new markets while producing and streaming content local to the area.

Opportunity to hold library of exclusive content from local studios

Cloud-based options available in Alibaba and Tencent

More efficient solution than current hardware boxes from Xiaomi

2

Be different

Diversify streaming library by adding content from non-traditional platforms

Develop platform for streams of games, VR, and other technologies

Offer streaming solution to sports leagues like the NBA

Offering more faith-based content

3

Be smart

Use advanced algorithm and big data to select and promote shows.

Personalize ads to promote Netflix's original content

Use big data to select new exclusives

Netflix using algorithms to determine which shows to purchase

With Algorithms

8.44

AVG Rating

Without Algorithms

6.79

AVG Rating

Netflix personalizing ads using algorithms

Use Case

Problem

Disengaged consumers that are not interested in Netflix exclusive content

Opportunity

Tailoring each ad to the tastes of each consumer (ie. Show different ads based on consumer behavior)

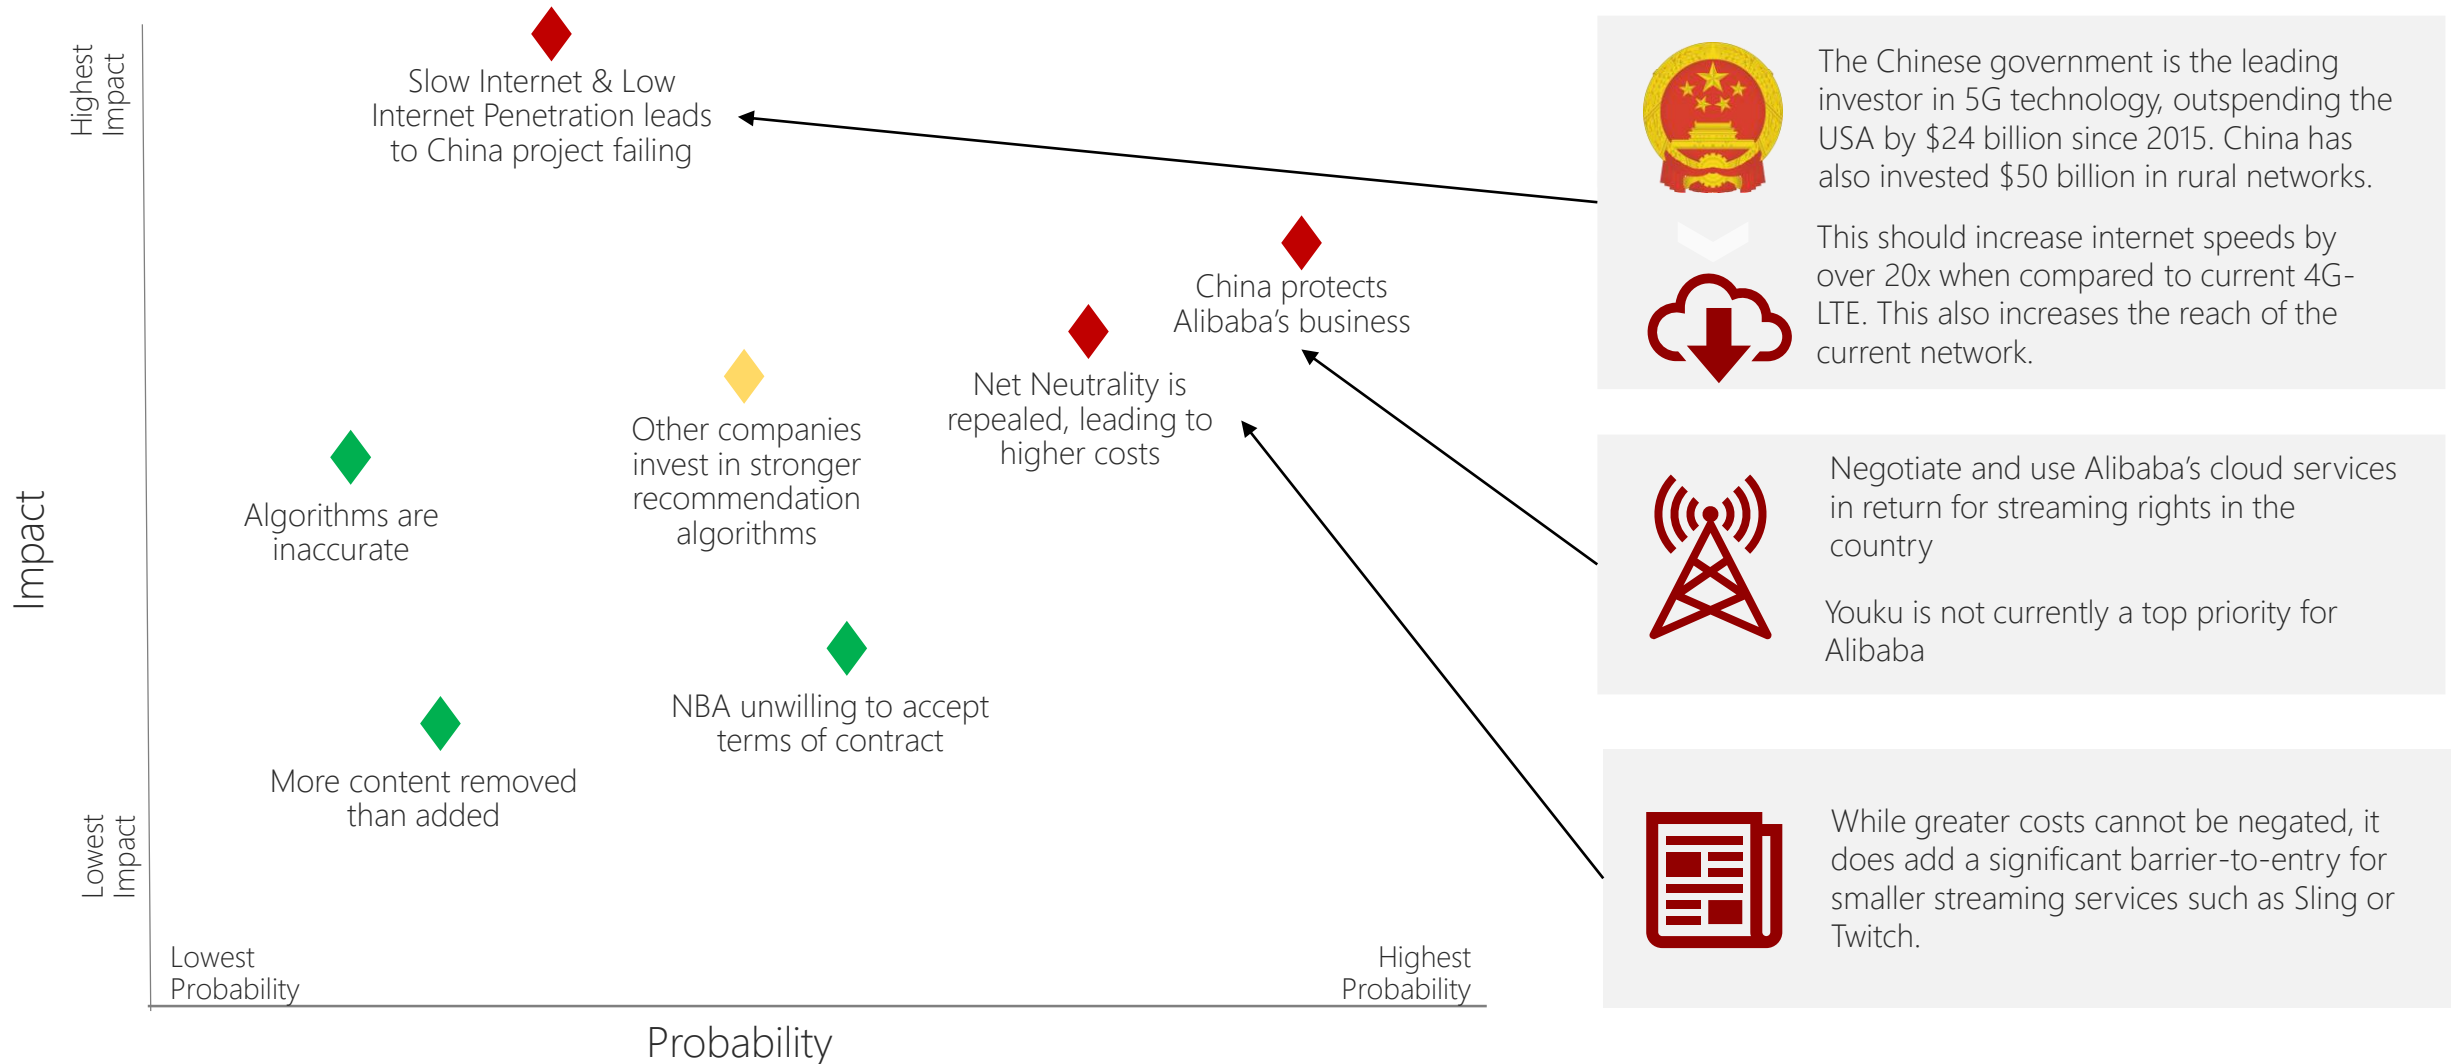

Result

Re-engagement of the consumer. The consumer is on the service for a longer period of time

NETFLIX

The various risks and their impacts

Appendix: Calculation Method (in millions of USD)

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8
Cost	2800	2100	1000	1000	900	900	900	900
Escalation		0.08	0.12	0.12	0.12	0.12	0.12	0.12
	-2800	-2268	-1120	-1120	-1008	-1008	-1008	-1008
Revenue	100	1200	2500	1400	1400	1400	1400	1400
Escalation		0.1	0.1	0.1	0.1	0.1	0.1	0.1
	100	1320	2750	1540	1540	1540	1540	1540
	-2700	-948	1630	420	532	980	980	980
NPV	\$370.82							
IRR	11%							

Appendix: Other Issues

Net Neutrality

Federal jurisdiction. Cannot be overturned easily

Offers higher barriers of entry to smaller streaming services

Low Internet Penetration

Still should sell their DVD service in favour of better odds at market

Could use hardware solutions to solve this problem.

Appendix: Other Considerations

Keeping Netflix DVD

Cash Cow that could be milked for the longest extent possible

Better to liquidate now.
Subscriptions have dropped rapidly,
and current assets are extremely
useful

Offer Hardware Box

Offer incredible performance for lower price than competitors

Goes against company vision. Is more expensive in the short term, and performance isn't necessarily needed

Removing Exclusive Content

Netflix Originals are generally well-received through algorithms

Lower bidding price for others. Gain no backlash from big studios.

Appendix: Other Countries of Interest

Japan

Large amount of movies and fast infrastructure, as well as a demand for this media

Major players already exist

Russia

Offers country-wide stable infrastructure with need for streaming services

Does not have a wide variety of useable local content that could be leveraged

India

Large amount of movies and TV Shows available in India, with little ways to stream them

Infrastructure is not stable enough country-wide, leading to capped revenues

Appendix: Exit Strategies

Selling Media to Alibaba Cloud

All bought media could be sold to Youku and Alibaba to maintain in their database

Changing from AWS to AC

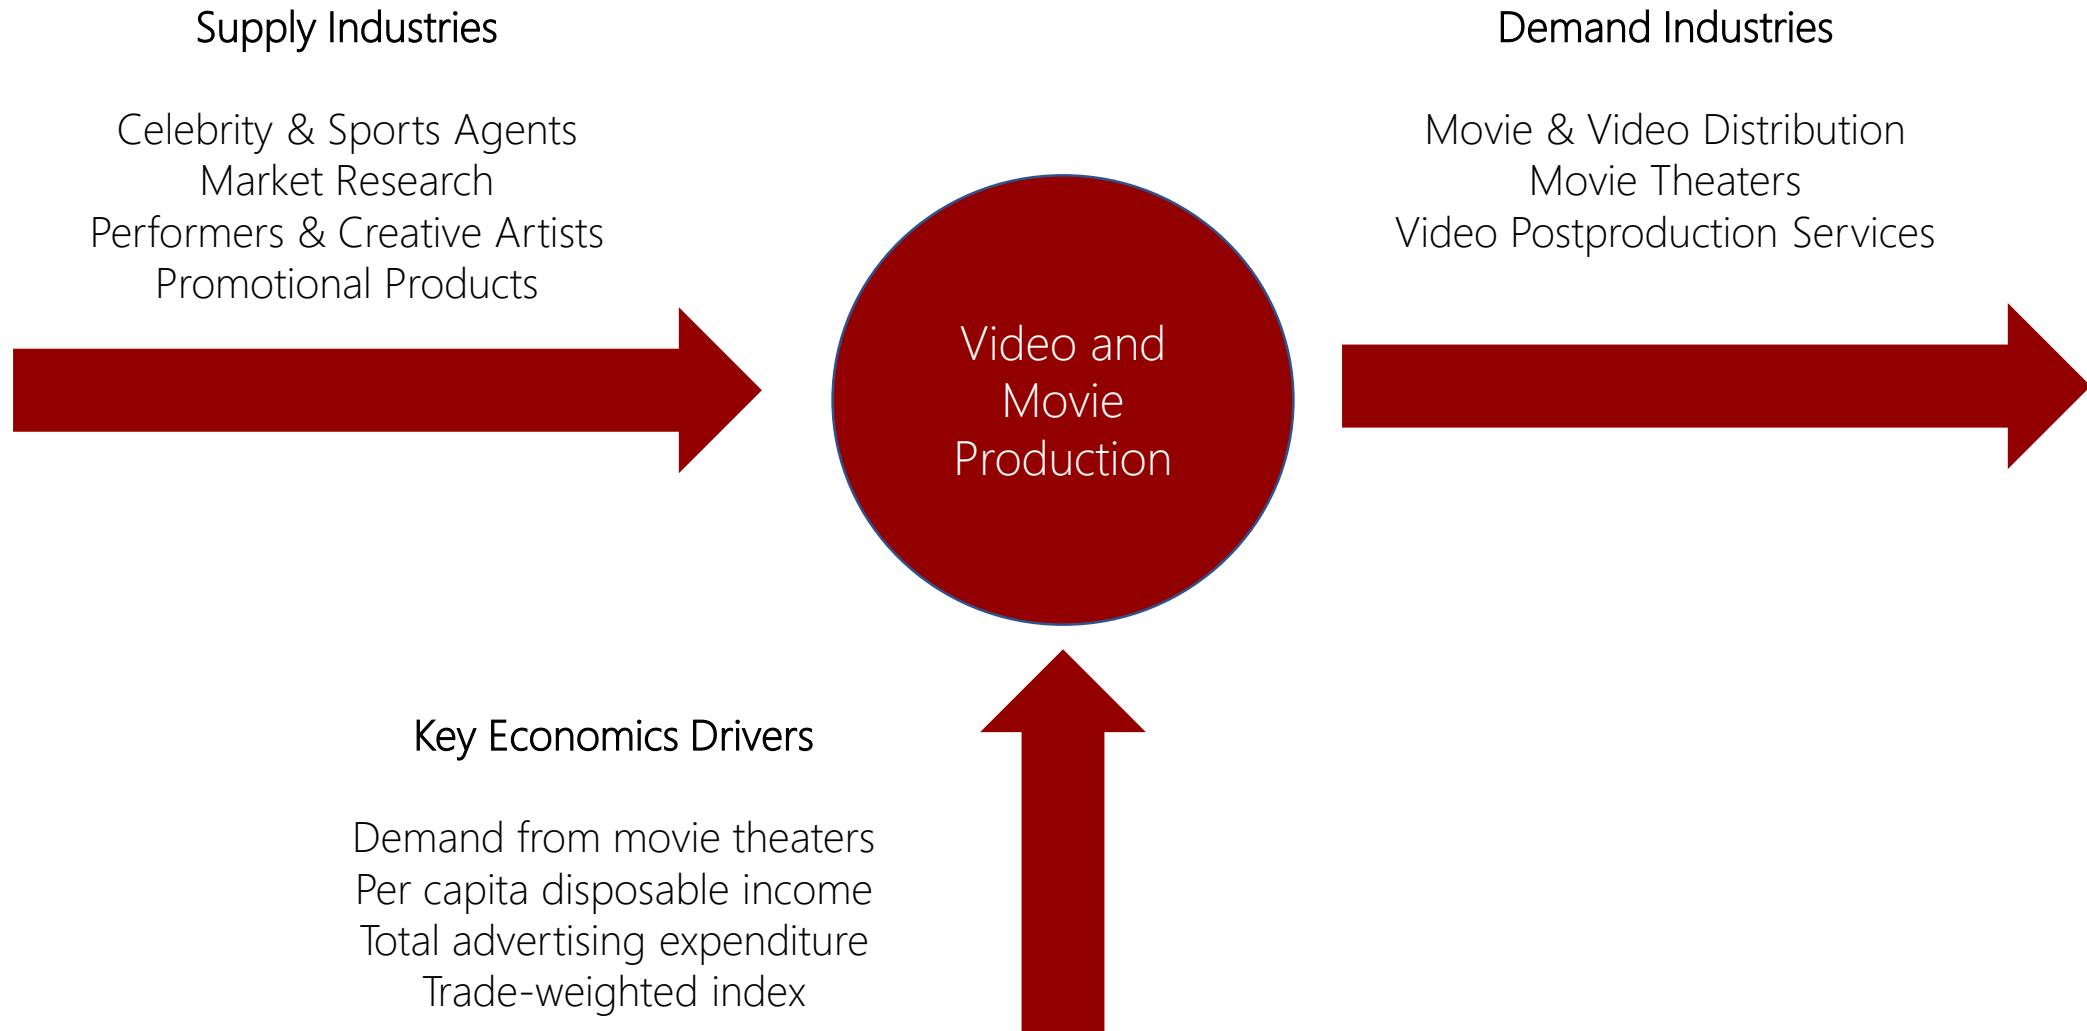

Can compete with Amazon Web by turning towards Alibaba Cloud if deal is unfavourable to Amazon

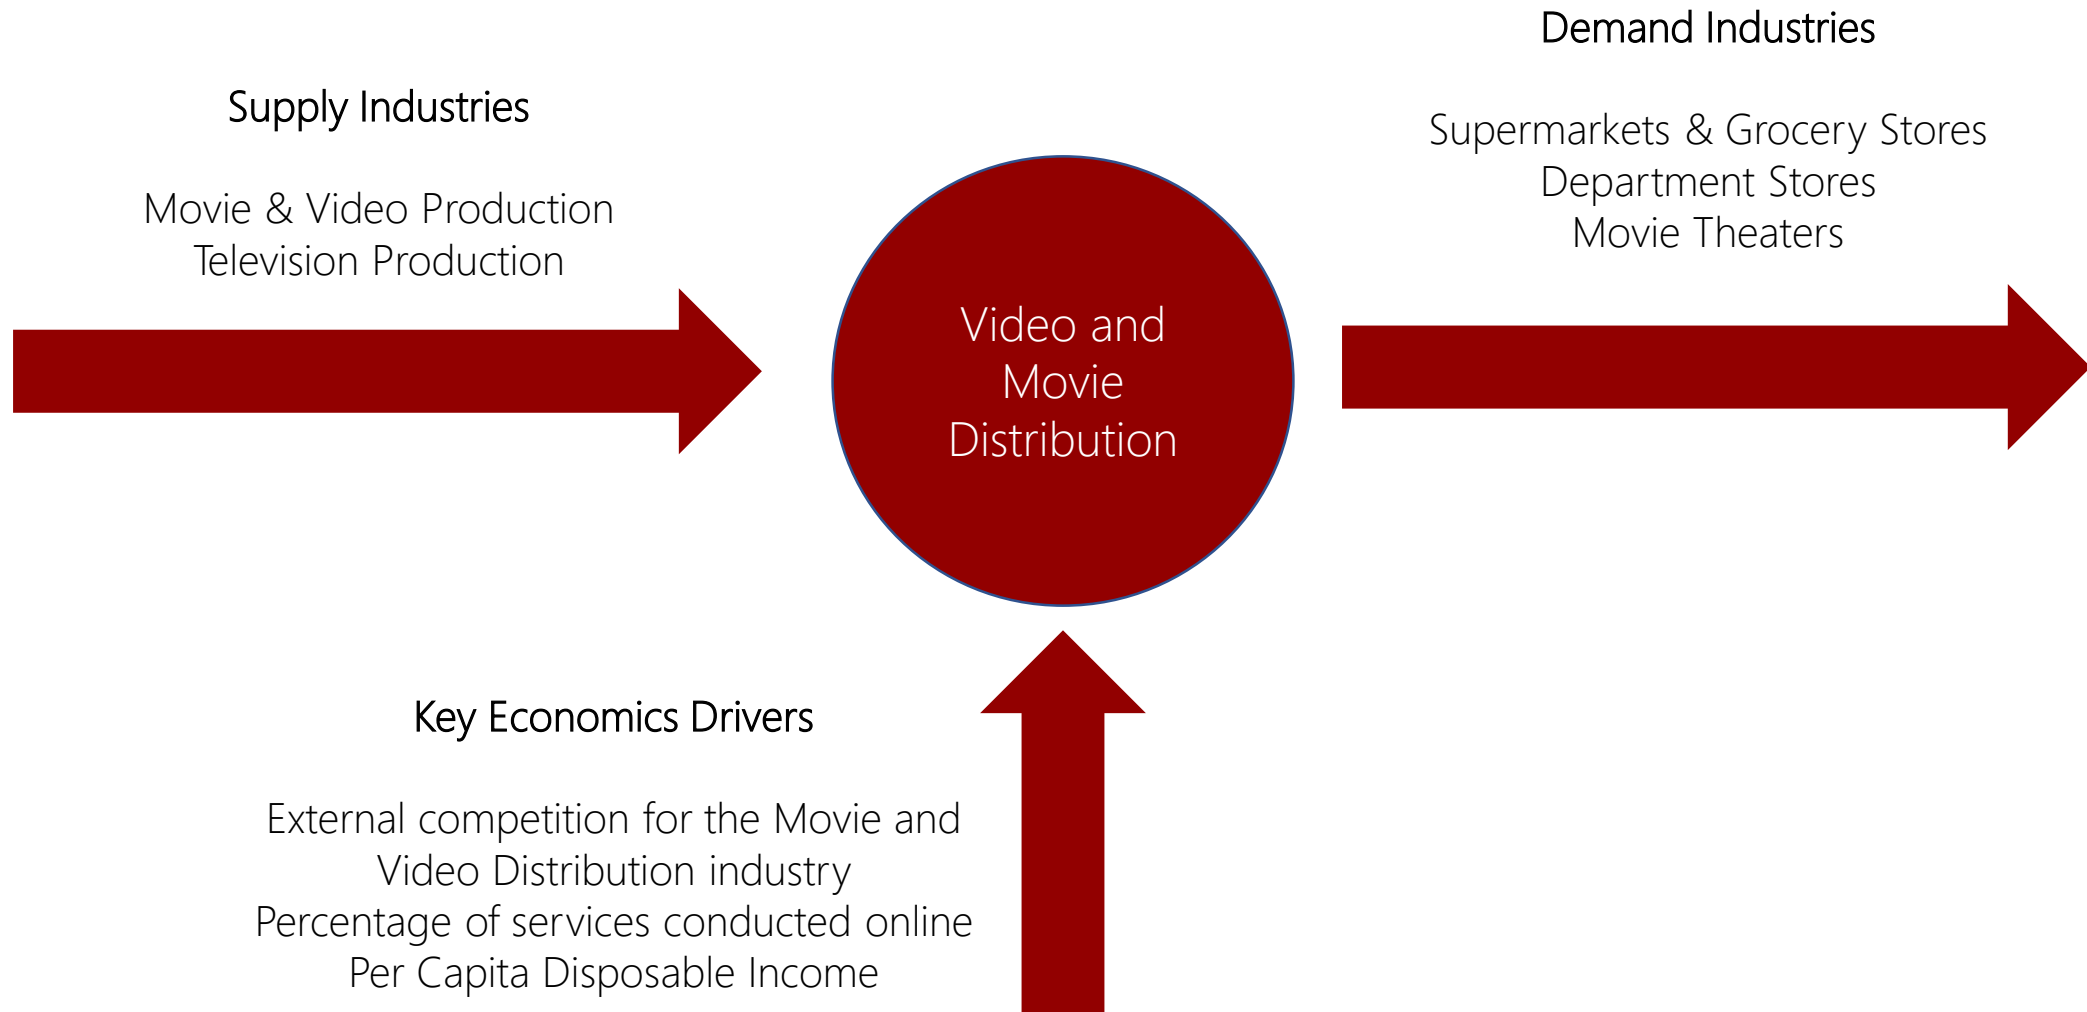

Return to Normal Ads

If Ads are not well received, Netflix could easily revert back to old promotion strategy

Appendix: Netflix Production Chain

Appendix: Netflix Distribution Chain

Appendix: China's High-Tech Industry

Government Involvement

\$400 Billion investment in high-tech sector

Network Infrastructure

Outspent the USA by \$24 billion on 5G networks since 2015 (Deloitte).

Physical Infrastructure

\$50 billion investment in logistical platforms and express distributing systems (Deloitte).

High Tech Innovation

Innovation in infrastructure

New Tech Acquisitions

41% of unicorns are Chinese (Fortune).

Research/Development

Alibaba tripled its R&D budget to \$15 billion. Focusing on AI and quantum computing

Appendix: China's High-Tech Industry & Government

Appendix: Concerns about China

Political Instability

- Investments into military instead of consumer technology
- Focus shifts away from middle class

Foreign Expansion

- Amazon plans to expand into China
- Possible promotion of Prime Video
